

CPSC 231 (Winter 2017)

TA: Samiul Azam

Exercise

- Write “CPSC” using python turtle graphics module
 - Not allowed to use turtle.write() function
 - can do it roughly with straight line segments (smooth curve is not needed)
 - Write the code into a python file. Run it from Linux terminal.
 - There's no marks for this exercise, and it's fine if you don't get completely finished.

Thank you
