

Tutorial

CPSC 217

Dictionary

- A collection of value
 - Each element in a list has an index (unique integer, starting from 0)
 - Dictionaries allow us to extend this idea (key and value pairs)
 - Each value in the dictionary has a unique identifier associated to it
 - Referred to as a key
 - Can be a string or a number
 - Items in the dictionary are unordered

String

- List of characters
 - `str1 = "samiul"`
 - `print(str1[0])`

Task

- Try exercise 6
-
